

SOVEREIGN ESCROW · USDC ON POLYGON

Hire remotely. Release when work clears.

Milestone escrow holds funds until the client approves delivery — then talent is paid through in-platform rails. Stablecoin for budgeting, escrow for releases.

USDC · Polygon

On-chain Sovereign Escrow. Contract addresses and parameters show on your Contracts page.

Card · Stripe

Fund formal offers with a company card when that rail is enabled for your workspace.

Milestones

Money follows contract and milestone state in the app — not a side spreadsheet.

OFFER → FUND → DELIVER → RELEASE

Four steps from hire agreement to payout.

STEP 1

Send offer

Client sends a formal offer with amount and rail. Preview shows the 10% platform fee split before send.

STEP 2

Fund escrow

After talent accepts, fund the milestone (card and/or USDC). Funds sit in escrow — not paid out yet.

STEP 3

Deliver & review

Talent submits work. Client gets a review window (typically up to seven days). Dispute in-app if needed.

STEP 4

Approve & release

On approval (or auto-progress if no dispute), funds release to talent minus the platform fee.

Off-platform deals are between the parties. Dispute and payout tooling apply only to funds that actually move through WeRemotelT rails.

SETTLEMENT STACK

Choose a rail. One clear release fee.

Payment rails

- **USDC on Polygon** — Sovereign Escrow for on-chain certainty
- **Stripe card** — when enabled for the company workspace
- **ADA treasury** — available on some programmes where configured
- Listing / job deployment fees are separate (see Pricing PDF)

Platform fee on release

10%

Calculated on the **gross amount released** to talent when work is approved. Offer preview in the workspace shows the exact split before you send.

Job posting may be free during launch; escrow and contract payouts always follow the in-product states shown on Contracts and Escrows.

WHO SEES WHAT

Client and talent each get an escrow dashboard.

Client · /escrows

- Fund milestones and track escrow status
- Approve delivery or open a dispute
- See platform fee on fund / release
- Company-scoped — never mixed across tenants

Talent · /escrows

- See funded milestones tied to your contracts
- Submit work and wait for release
- Track payout after approval
- Same contract thread as web messaging

Mediation and paid support for an engagement assume funds were committed through in-app Stripe and/or on-chain escrow flows.

READY TO SETTLE ON-PLATFORM

Post a role, send an offer, fund the milestone.

Live contract UI always wins over this leave-behind. Pair with Pricing for listing fees and Security for how we isolate company money.
